mixed bag not taken into account, specialist get into back and forth as if one illness, when variety, mixed bag
some flaws clear to someone with high school health classes

At same time, variety of articles in literature going bak decades..."Healthy Environments for Canadians" 244 pps, 1947, 1903,

MOST CRITICAL NOT TO SUGGEST OR RIDICULE THOSE WITH DEPRESSION REACTIONS AS HAS HAPPENED IN ONTARIO HOSPITALS...LED TO SUICIDES...

b) misconceptions prevent problem being dealt with

FAMILIES BROKEN UP, REASONABLE ACCOMMODATION DENIED IN WORKPLACE, CAREERS RUINED, CHILDREN INNAPPROPRIATELY DISCIPLINED, DEVELOPMENTAL PROBLEMS, INNAPPROPRIATE AGGRESSION, COPING

c) "rescue" chronic, especially psychiatric

JUST GETTING DIAGNOSIS LESSENS ANXIETY NIGHTMARE... INNAPPROPRIATE BLAMING FOR ILLNESS, SIDE EFFECTS OF DRUGS, RECIDIVISM...DEALING WITH SOFTWARE PROBLEMS WHEN HARDWARE AFFECTED....DEALING WITH HARDWARE IMBALANCES INSTEAD OF REMOVING ENVIRONMENTAL AGENT PROVOKING THEM IN SUSCEPTIBLE PEOPLE...

D) LISTEN TO PATIENT, EXPLORE WITH THOSE UNAWARE, LOOK FOR THOSE, LIKE DEAF PEOPLE, MAY BE IN WRONG PLACE BUT WHO SHOULD NOT BE LEFT THERE JUST TO COVER UP IGNORANCE OF DISORDER IN PAST.
